Jay Series™
2006 Camping Trailers by Jayco®

AMERICA'S MOST **LIVEABLE** RVs.

"Liveable," to our customers, it could mean comfort. To our designers, it's a refined, ergonomic floorplan. For those who build them, we see value. The definition is most likely "all of the above" ...and then some.

1206

GET COMFORTABLE WITH NATURE.

Camping trailers and the word "comfort" have rarely been seen in the same sentence, let alone a dealer showroom. Until now. Introducing the Jay Series.

Outside you have the patented, tubular lifting system and a one-piece Camper-TeX™ tent. Inside, you have the famous Jayco comfort of a travel trailer.

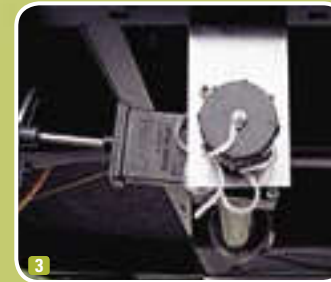

1207

1

2

3

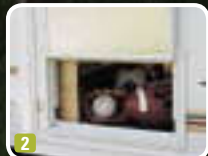

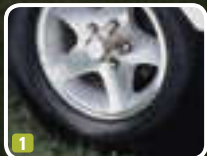

1. Our Camper-TeX™ one-piece Velcro® tent attachment system seals tightly, keeping the warmth in and the rain and insects out.
2. The secure retractable step makes getting in and out simple and safe.
3. A 17-gallon water tank is positioned beneath the floor in order to maximize cabinet storage space.

~~LIVEABLE CAMPING TRAILERS~~

Select™

2006 Camping Trailers by Jayco®

MORE THAN FUN IS INCLUDED.

1. The Select comes with many attractive touches like polished aluminum rims. 2. Store extra items in the large space underneath the dinette area. Storage is accessible from both the inside and outside. 3. The front trunk storage area is perfect for storing long items, such as skis or golf clubs. This storage area is also accessible from inside of the camper and outside through the baggage door.

ENJOY THE WIDE-OPEN SPACES.

The Jayco Select is all about space. Higher walls get countertops up to "home" level allowing for larger refrigerators, more headroom and lets cooktops become full ranges. The wide-body construction also adds more storage space and storage of larger items.

1. The standard microwave and the optional oven and range allow you to cook your favorite meals while you're on the road.
2. Select includes a large 3-cu.-ft, 3-way refrigerator that keeps your favorite travel foods cold and fresh.
3. Courtesy floor lights help your family get around safely during the night.

LIVEABLE CAMPING TRAILERS

Baja™

2006 Camping Trailers by Jayco®

Baja
by Jayco

NO ROAD? NO PROBLEM.

You want to rough it. You crave the real camping experience, far away from campsites and groomed trails. For you, the ultimate adventure is shooting down a mountain on a bike or scaling a sheer cliff. No matter how far-flung your destination, the Baja camping trailer will get you there.

IT FOLLOWS YOU EVERYWHERE.

Here's what you need to know. 13 inches of ground clearance, running on 15" off-road Dunlops, all suspended by shocks and leaf springs ... siick!

If that's not enough, how about an outdoor Bike-Port™, big enough for two bikes or an ATV! ... ramps included.

10Y

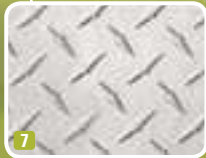

1. Conquer the roughest terrain with 15" Dunlop® Mud Rover off-road tires. Dent-proof rubber fenders and protective mud flaps are also standard.
2. Store your adventuring essentials in the optional diamond plate tool box.
3. Going off the beaten path is no problem for the Baja camping trailer, thanks to its shock absorbers and leaf springs.

LIVEABLE CAMPING TRAILERS

Jay Series™ • Select™ • Baja™

2006 Camping Trailers by Jayco®

1. Jayco's unique Velcro® tent-to-bunk end attachment system is stronger than the bungee cord system used by competitors. 2. You won't have to crouch down and reach underneath the camper, thanks to our crank-down stabilizer jacks. 3. The optional powered attic fan in the bathroom improves ventilation. 4. EZ Lube® axles with removable caps make maintenance a snap. 5. The single-piece Structurwood® floor is undercoated and edge-sealed to repel moisture and maintain its durability. It comes with a lifetime warranty. 6. Spills are no match for our reversible, anti-slide dinette cushions with vinyl backs. Simply wipe off or remove for a more thorough cleaning. 7. The front diamond plate and sturdy LP gas bottle cover protect the front end from road debris. 8. Jayco's rugged end bunks can handle a substantial amount of weight (1,050 lb. capacity per bunk). The bunks, made from 5-ply exterior-grade, weather-treated plywood, are mounted on steel slides with smooth rollers to make it easy to set up in minutes.

Where Durability and Livability Meet.

Jayco's Patented, Fully Enclosed Roof Lifter System

- a. Jayco uses tubular lifter posts instead of C-channels. They have smooth walls and no edges to chafe or soil the tent with grease. They also have no openings. Fingers can't get inside, eliminating the chance of injury!
- b. Stop worrying about cables or pulleys getting caught in lifter posts. Strong flexible steel push-rods guide the roof up as you crank.
- c. For years of trouble-free operation, Jayco camping trailers use nylon bushings in the lifter posts. This reduces friction, wear, and tear.
- d. The automatic brake on our lifter system winch helps prevent the roof from falling before it's all the way up so it's OK to take a break while cranking.
- e. Our lifter system crank is set at an ergonomic height. You don't have to bend way over or scrape your knuckles to use it. We also made it easier to turn, so setup is a cinch.
- f. The roof-lifter system on all Jayco camping trailers is fully enclosed above the floor. This eliminates damage to parts from road debris and weather as a result of transit—a common problem with competitors' underfloor-mounted lifter systems. It also eliminates rodent or insect access points found where competitors' cables pass through the floor.

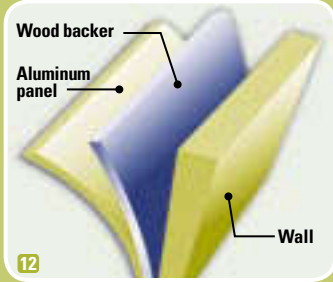

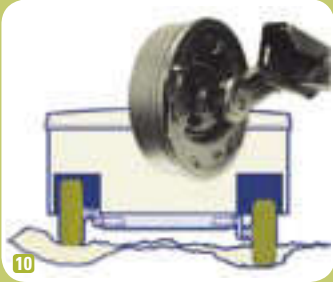

9. Our patented, fully enclosed roof lifter system has a lifetime warranty and is easy to set up.

10. Jayco's exclusive TorFlex® independent torsion-axle suspension provides more ground clearance, simplifies towing and absorbs bumps that cause wear and tear.

11. Our robust, corrosion-resistant frames are finished with our 12-stage E-Coat™ finishing system and come with a lifetime warranty.

12. Double-laminated wall construction with wood backers reinforces the strength of sidewalls, protecting it from bows and dents. Unlike competitors' single wall, non-backed units, Jayco goes the extra mile by screwing the sidewalls to both the floor and frame.

13. Jayco's old-world Amish craftsmen build RVs with the same tried-and-true construction methods used for generations.

It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle and the RV together before heading out on the roadways. When you tow an RV, you must drive differently than you do when driving a single vehicle. Practice hooking up, driving, backing up, and braking in a safe environment or seek out professional instruction. Jayco affixes a weight label to each RV which lists weight information for that vehicle. See specification chart above. This chart is for guidance only, specifications may vary.

Unloaded Vehicle Weight (UWV): Sometimes referred to as "Dry Weight," UWV means the typical weight of this trailer as built at the factory. The UWV, as used in product literature and other promotional materials, does not include cargo, fresh water, LP gas, options, or dealer-installed accessories.

Gross Vehicle Weight Rating (GVWR): GVWR means the maximum permissible weight of the trailer, including the UWV plus passengers, personal items, all cargo, fluids, options, and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UWV and the CCC.

Cargo Carrying Capacity (CCC): CCC means the maximum weight of all passengers, personal items, food, fresh water, LP gas, tools, other cargo, and dealer-installed accessories that can be carried by the trailer. CCC is equal to or less than GVWR minus UWV. The addition of options will decrease the CCC.

Hitch Weight (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight.

Your Jayco Dealer

See above dealer for further information and prices.

We Back What We Build.

The Jayco Co-Pilot Warranty is a manufacturer's limited warranty. It doesn't come from your dealer and it's not an extended warranty! It comes from the people who build Jayco recreation vehicles to the people who buy them. Each Jayco is warranted to the original purchaser for twenty-four (24) months or twenty-four thousand (24,000) miles (mileage limitation applies to motorized products only), whichever occurs first, from the original date of purchase against defects in materials and workmanship. In addition, our limited warranty may be transferred one time within the warranty period. Go ahead and compare the Jayco warranty with other manufacturers' warranties. You'll find it's the best in the business!

For a copy of the limited warranty with full terms and conditions, ask your local Jayco dealer or visit our web site at www.jayco.com.

Lifetime Coverage.

Jayco offers to the original purchaser additional industry-leading lifetime parts and labor coverage on our lifter system, roof, floor, and frame. We also offer five-year (5) coverage on our tent with parts, labor, and freight covered the first two years; parts, factory labor, and return freight during years three, four, and five.

AMERICA'S MOST LIVEABLE RVs.
